**U.S. Pride Products**  
Presents

Hands Free  
**Log  
Splitter**

The Hands Free Log Splitter can be produced to attach to most makes and models of skid steer. It is easily attached to the skid steer with the coupler levers and the quick attach mounting plates. Once attached to your skid steer you can split as many logs as you want in the comfort of your skid steer. No more back aches from splitting logs.

## What can it handle?

The Hands Free Log Splitter can handle almost any log. It has the ability to split fresh cut or seasoned logs. It has been tested on midwestern wood species including oak, elm, birch, etc.

## Ordering Your Hands Free Log Splitter

When placing your order for your Hands Free Log Splitter, be sure you list the correct specifications for your skid steer. Splitters can be molded for large or small equipment.
