HF-400 CONE SCREW SPLITTER

Specifications: HF-400 (2 Spd)

Splitter Weight - lbs.....	750
Cone Size - length x base	30 x 16
Max Split Size.....	12' in length
Oil Quantity - gpm.....	15-47
Oil Pressure - PSI.....	2,400 - 5,500
Carrier Weight - lbs.....	6,000 - 20,000
Torque - ft-lbs.....	9,500

The HF-400 now comes standard with a 2-speed motor producing massive torque - 9,500 ft-lbs. Also shown is the accessory thumb bracket to provide a secure steel structure to clamp your hydraulic or manual thumb against.

HF-400 Hands Free Cone Screw Log Splitter

U.S. Pride splitters are known for their legendary durability and the HF-400 will carry that legacy on. To counter some of the lateral forces that mini-excavators can put on attachments, we increased the main shaft and bearings to make sure the HF-400 is as durable as the rest of our splitter lineup. We also gave it a larger cone to increase splitting efficiency. The HF-400 can easily split 12 foot long logs all day long! Excavators of all sizes are great machines to mount our cone screw splitter attachments on. Their ability to reach over log piles and maneuverability give them an edge over other carrier types.

Commonly Used By:

- High Volume Firewood Processors
- Mulch Producers (Large)
- Small Land Clearing Companies
