Our HF-150 is a powerhouse in its own right! It's a small to mid-sized splitting solution that can take on logs up to 7 feet long all day!

HF-150 Hands Free Cone Screw Log Splitter

If you operate a mid-sized skid loader, the HF-150 is for you. With the increased hydraulic power that these carriers have, splitting ability and speed increase significantly over our HR-100 mini. Skid steers in this class, combined with the HR-150 splitter, offer a great balance between portability to jobs as well as great production capabilities. The HF-150 is a great choice for any company that needs to reduce larger logs into manageable pieces on a wide range of job sites. U.S. Pride cone splitters can run on standard flow and high flow hydraulics (High flow is always preferred).

Commonly Used By:

- Tree Services (Medium - Large)
- High Volume Firewood Processors
- Mulch Producers (Small - Medium)
