HF-800 CONE SCREW SPLITTER

REQUEST
A DEMO

Specifications: HF-800

Splitter Weight – lbs.....	1,600
Cone Size – length x base.....	32 x 16
Max Split Size.....	20' in length
Oil Quantity – gpm.....	45
Oil Pressure – PSI.....	3,500 – 4,500
Carrier Weight – lbs.....	12,000 – 62,000
Torque – ft-lbs.....	15,000

The HF-800 is the absolute beast of our line-up. Built for full size excavators, the HF-800 can split 20' long logs.

HF-800 Hands Free Cone Screw Log Splitter

The HF-800 is the industrial sized splitter in the line of U.S. Pride hydraulic cone screw log splitters. We've engineered it to run on full size excavators with at least 45 gpm of hydraulic flow. With a 16 inch diameter cone, the HF-800 can take on logs up to 20 feet long with ease. An excavator mounted log splitter is one of the most productive ways to split big logs. You simply can't beat the boom reach, mobility and hydraulic power of an excavator compared to skid or wheel loaders. If you're running a large land clearing operation or wood processing yard for firewood or wood fuel, the HF-800 cone wood splitter is a great choice.

Commonly Used By:

- Large Land Clearing Companies
- Mulch Producers (Large)
- High Volume Firewood Processors
